Re: 2023 Diocese of North Dakota Compensation Schedule

Below are the adjusted minimum clergy compensation figures for 2023 as set by the Diocese of North Dakota. These figures add a step increase of .25% increase per year of active service and gives a 5% cost of living increase. All full-time stipendiary clergy in North Dakota should be at or above the figures in the table below that apply to their years of active service. If the clergy person is not provided with a rectory, the "Housing Allowance" column applies which adds 30%, which is the amount set by the Church Pension Fund for the value of a rectory provided. Figures in both the Rectory Provided and Housing Allowance columns represent total cash compensation and include housing allowance designation and/or utility (parsonage) allowance designation.
